

COMfortel® 600

Attractively designed, versatile analogue phone with contrasting display and speed dialling keys

- Calling number and name display (CLIP and CNIP) if registered in the local and the central phone book of the PBX
- 99 phone book entries with name
- 10 programmable abbreviated dialling keys
- Separate interface for not cordless headsets
- Speakerphone mode

Your advantages in detail

Even the entry-level model in our COMfortel series has a cross-shaped touch pad to help you navigate through the menu. Together with the adjustable housing feet, which set the phone's angle, this makes everyday use (for example, as an extension to a PBX) more convenient. The option to mount the phone on a wall is particularly useful in hotels, workshops and industrial settings.

When connected to an analogue extension connection, the COMfortel 600 has a multitude of useful functions to make telephoning more convenient: Every telephone number stored in the local or central tele-

phone book is shown clearly on the three line LC display, along with the relevant name. The crystal-clear sound quality brings your call partner within arm's reach, no matter whether you're making an analogue call with a receiver, in hands-free operation or with a COMfortel H-100 headset.

Although the COMfortel 600 is ideally suited for use as an extension to our PBXs, it is equally at home on a/b ports on PBXs from other manufacturers or even when connected directly to analogue exchange line connections.

Features at a glance
