

COMfortel® H-200

Minimalist design with professional sound

- Flexible device connectivity
- Quick Disconnect technology
- Excellent sound quality
- Protection against sound level peaks
- Ergonomic design

Your advantages in detail

With the extremely lightweight headset COMfortel H-200 you have both hands free when making phone calls or in phone and video conferences. This makes everyday office life much more efficient and comfortable, because for people who talk on the phone for more than two hours a day, a headset reduces neck pain and tension in the upper back area.

The solid, 300-degree adjustable headband can be worn on either side and ensures a perfect fit. With excellent sound quality and noise suppression, harmful sound level peaks are cut off before they enter the ear. This keeps the noise level within safe limits and protects your hearing. Despite the corded headset,

with the COMfortel H-200 you enjoy the freedom to move away from your desk without having to take off the headset. The Quick Disconnect cable can be easily disconnected, your call is held until you reconnect the cable.

The COMfortel H-200 is universally applicable. You can connect it to all common desktop phones* either via the connection cable included in the scope of delivery or via a separately available USB cable (article no. 90081) to your laptop or PC.

*For the COMfortel 600/1400/1600 and COMfortel 1400 IP you need a 4-Pin cable (article no. 90080).
