Datasheet

COMfortel® M-210

Robust and convenient – this DECT handset is easy to use and has a multitude of practical functions for professional use

- Brilliant voice quality
- Colour display with easy to use menus
- Robust housing with elegant design
- Features especially for office environments
- Optimum availability of employees due to increased site mobility

Your advantages in detail

The subtle and elegant exterior of our COMfortel M-210 belies the fact that it has a robust core: this DECT handset even withstands being accidentally dropped. At the same time, it provides a long list of practical functions ideally suited for mobile employees in the craft sector, trading and office environments: the brilliant colour display and intuitive menu structure make accessing the local phone book with its 250 name capacity (4 numbers per entry!) easy. If desired, entries can be added to the integrated phone book directly from the call list. And of course any name search will consider entries in the central telephone system's address list.

Thanks to its Bluetooth® 2.0 interface, you can attach a wireless headset, keeping hands free at all times. The large selection of ringtones lets you distinguish between any number of handsets easily, even if several subscribers get a call simultaneously - an indispensable feature in a professional working environment. The COMfortel M-210 proves its worth by being especially practical, emphasising its readiness for use with up to 24 hours talk time and 130 hours in standby. It is clearly a business handset which considerably improves onsite mobility in an elegant way.

COMfortel® M-210

Features at a glance
