

COMfortel® SoftPhone 2

New softphone and messaging solution with mobile and secure connection to COMtrexx and COMcompact ICT systems

- Cost-effective soft client for SIP telephony and instant messaging
- Secure and easy PBX connection from anywhere via Auerswald Cloud Service – no VPN required
- Apps for PC, Mac and smartphones with the same user interface
- Keyboard shortcut for direct dialling and 1-click log in and log out into call groups

Your advantages in detail

COMfortel SoftPhone 2 optimizes employee accessibility in a simple and secure way. The soft client for telephony and internal company chat is available for Windows, macOS, iOS and Android with a multi platform user license.

The secure and location-independent connection to your COMtrexx or COMcompact ICT system is guaranteed by an innovative Auerswald cloud service, which makes the complex and maintenance-intensive connection via VPN superfluous.

COMfortel SoftPhone 2 is the cost-effective alternative to the comprehensive Unified Communication and Collaboration (UCC) solution PBX Call Assist. Whenever the premium functions of PBX Call Assist - integration into business processes, video chat or file and desktop sharing - are not required, COMfortel SoftPhone 2 is the best investment for COMtrexx and COMcompact users. Thanks to the easy set-up by scan-

ning a QR code, the COMfortel SoftPhone 2 is up and running straight away.

COMfortel SoftPhone 2 is available to all COMtrexx users without restriction after a test period if a maintenance contract has been agreed between the specialised trade partner and the user for the system (the basis for this is [COMtrexx maintenance](#)).

For users of a COMcompact 4000, 5200(R) or 5500, the licenses for COMfortel SoftPhone 2 are available in the Auerswald online shop. Free 30-day test licenses for COMcompact are also available in the shop.

Important note for current users of the previous version of COMfortel SoftPhone (1st generation): You can upgrade to COMfortel SoftPhone 2 free of charge until May 31, 2025! This means you benefit instantly from all the new advantages of the SoftPhone 2 at no additional cost. The only prerequisite: all user licenses of a system must be upgraded; a later downgrade is not possible.
