

COMfortel® Xtension300

Add-on module with 30 freely programmable function keys for the COMfortel 2600, 2600 IP, 3200, 3500 and 3600 IP telephones

- Stable mechanical connection with special fasteners
- Can be expanded to max. three add-on modules
- 30 keys each with two levels and multi-coloured LEDs for 60 (system) functions and speed dialling programmable
- Second function level can be accessed by double-clicking or simultaneously holding down the shift key
- Convenient configuration and creation of the key descriptions via the telephone's web server

Your advantages in detail

The 15 freely programmable keys on the basic device are not enough? Do you need additional function keys so you can use SIP or system functions at the touch of a button? Then extend your COMfortel tele-

phone easily with up to 3 COMfortel Xtension300 key extension modules. The maximum extension provides you with up to 210 function keys with which you can easily and clearly perform speed dialling or other functions.
